

For Use On: Small Grains

Crown_{fx}TM is a carefully chosen combination of microorganisms that have been tested and selected to elicit a positive crop response. Crown_{fx}TM enhances the plant's ability to metabolize nutrients and efficiently support growth.

Benefits:

- Increased Yield
- Phosphate solubilization through microbial activity
- Increased leaf area and tillering
- Reduced ethylene production (associated with aging and senescence)
- pH regulation
- Increased early vigor, tillering/head formation
- Reduced Reactive Oxygen species
- General stress mitigation
- Stronger stems and increased seeds per head as well as total number of heads per plant
- Increased protein and grain quality
- Greater stem strength and plant mass

Application Rates

Seed: 1 fl. oz. per 50 lbs. seed via seed treater. Crownfx is intended for application to the seed. If considering a foliar application, use Ion_{fx}.

Cautions: Should not use hormone-based plant growth regulators (PGR) with this product because the combination may result in stunted growth. Do a jar test to verify compatibility with other products.
